Lalor East Primary School
Assessment and Reporting Policy

Rationale

Assessment is the ongoing process of gathering, analysing and reflecting on evidence to make informed and consistent judgements to improve future student learning. Assessment for improved student learning requires a range of assessment practices to be used with three purposes: Assessment for learning - teachers use inferences about student progress to inform their teaching, Assessment as learning - students reflect on and monitor their progress to inform their future learning goals and Assessment of learning - teachers use evidence of student learning to make judgements on student achievement against goals and standards.

Reporting is the process by which assessment information is communicated in ways that assist students, parents, teachers and the system in making decisions by providing information about what students know and can do, along with recommendations for their future learning.

Parents, grade and specialist teachers, students, the school administration and outside agencies [educational psychologists and speech therapists where appropriate] will be involved in the assessment process.
